

Findings: Data for Progress polling finds that voters are strongly in favor of expanding the Earned Income Tax Credit (EITC) and other tax credits to full time caregivers. We find majority support for these policies across age group, party identification and other demographics.

Methodology: From 7/10/2020 to 7/12/2020 Data for Progress conducted a survey of 1,390 likely voters nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is +/- 2.6 percent

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

The Earned Income Tax Credit (EITC) provides tax refunds to people who do paid work. Do you support or oppose expanding the credit to people who are caring for a family member full-time?

Response	Topline	Democrat	Independent / Third Party	Republican	Female	Male	Under 45	45+	No College	College	Black or African American	White
Strongly support	38	47	25	37	39	38	38	39	36	42	42	38

Currently, family caregivers -- those who care for a family member full-time -- don't qualify for many tax credits. Since many schools may not reopen full-time in the fall, would you support or oppose making family caregivers eligible for existing tax credits?
